PRODUCT DESCRIPTION

Optimum’s 45-Minute Fire-Rated Hot-Rolled Fixed Windows are used in non-temperature rise applications and through various glazing options, can be modified to address most fire-rated applications. Its narrow profiles provide open vision areas that allow natural daylight without compromising life-safety and design flexibility. The entire Fire-Rated line has been through rigorous testing. Initially, a “heat test” is performed where the window is exposed to temperatures up to 1600 degrees Fahrenheit. They will then endure the “Hose Stream Test”, wherein which the glass holds fast even during this extreme change in temperature. Where other units of different material will react poorly when placed under these extreme conditions, Optimum’s Fire-Rated Steel Window will hold and maintain its integrity.

FEATURES

- Fire rating of 45 Minutes
- Solid Hot-Rolled steel sections
- Fully welded corners
- Narrow steel profiles
- Can accommodate glazing ranging from 3/16" to 1" in O.A. thickness
- Factory glazed with mechanically fastened steel glazing beads
- Powder Coated finish; Non-Metallic Custom Color match

AVAILABLE OPTIONS:

- Wire or Ceramic Glass
- Low-E Coated IGU
- Safety Impact Glass available
- Surface Applied Grids (spacers between glass n/a)
- Exterior or Interior flanged frame
- Installation Straps
- Break Metal for Trim
- Steel L-Angle Glazing Bead

NOTE: This product is intended for use in locations requiring fire-protective rated openings.
